

HydroClear™ DeFoam quickly, and safely eliminates unsightly foam in pondless water features, fountains, water gardens, Koi ponds, Hybrid Ponds™ and CrossOver Ponds™.

HydroClear™ DeFoam contains a "Food-grade" silicon anti-foam compound.

Foam is caused by undissolved organics in water. HydroClear™ DeFoamer eliminates unsightly foam quickly and safely for a more attractive pond or water feature.

If foam persists five minutes after treatment, repeat dosage until foam is no longer present.

Persistent foaming indicates high concentrations of undissolved organics. Use HydroClear™ DeFoam together with HydroClear™ Heterotrophic Bacteria and partial water changes to eliminate the excessive organics that are causing the foaming.

HydroClear™ DeFoam is safe for use in conjunction with all other HydroClear™ products.

Safe for Koi, ornamental pond fish, plants, birds, and wildlife when used as directed.

Shake well before using.

Dosage:

1 ounce per 100-500 gallons*

16 fl. oz. per 1,600-8,000 gallons*

*Or as needed

KEEP OUT OF REACH OF CHILDREN. NOT FOR HUMAN OR ANIMAL CONSUMPTION
