

HydroClear™ Total Control Water Conditioner is one of the most all-inclusive water conditioners available. It is specially formulated for Koi ponds, water garden ponds, Hybrid Ponds™ and Cross-Over Ponds™. Our comprehensive and balanced formulation can help eliminate potentially harmful interactions that may arise from mixing multiple water treatments.

HydroClear™ Total Control Water Conditioner removes chlorine *and* chloramine from municipal water sources, detoxifies heavy metals (including copper) from well water sources, removes ammonia and nitrite caused by new or insufficient bio filtration systems, replaces fish skin slime coat as a result of handling, reduces fish stress and adds essential electrolytes.

HydroClear™ Total Control Water Conditioner is like having an 8-in-1 formula without the possible harmful side effects of mixing multiple products from multiple manufacturers. The result is a more comprehensive and safe water treatment regimen at a lower overall cost than purchasing multiple products.

Store away from heat and direct sunlight.

**Apply to circulation points:**

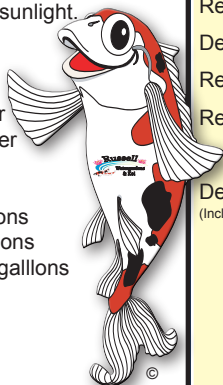

5 ml per 10 gallons of water  
16 fl. oz. per 960 gallons of water  
1 gallon per 7,680 gallons of water

**To remove:**

**Ammonia:** 16 oz. per 960 gallons

**Chlorine:** 16 oz. per 1,920 gallons

**Chloramine:** 16 oz. per 3,072 gallons
